

Alpha Numeric Cross Reference Guide/Guide de référence Alpha Numerique

These cross references are by manufacturers' type reference or series number. Ampere rating must generally be added for ordering purposes. Fuse characteristics can vary between manufacturers and should be checked for proper coordination as required.

Ce guide est selon les numéros de référence des manufacturiers. L'ampérage doit être ajouter à ces numéros. Les caractéristiques peuvent varier d'un manufacturier à l'autre. Une étude de coordination est recommandée. Pour une liste de reference plus complète demander Bulletin EC501K
